

A spot for entrepreneurs

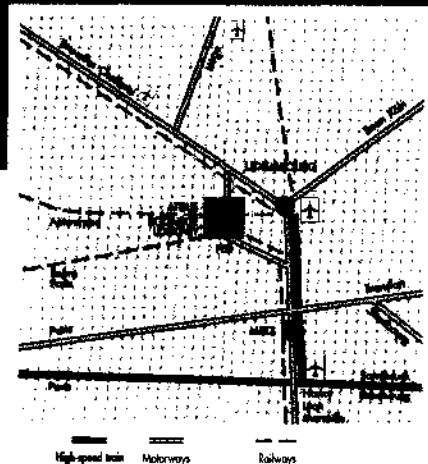

EUROPEAN DEVELOPMENT AREA

A spot to prosper

in the corridor of future economic growth.

The European Development Area (EDA), a transnational pilot project, was organized in 1985 between the French, Belgian and Luxembourg Governments together with the Commission of the European Communities.

With its exceptionally advantageous location, straddling the Luxembourg, Belgian and French borders, the European Development Area is right in the middle of the vital development band running from the United Kingdom to the industrial cities of Northern Italy.

A spot to settle down

with a population of 300,000.

The European Development Area is situated in an area combining urban development with largely unspoilt countryside, offering forests, hills and lakes.

The attractive town of Luxembourg, for instance, is at a mere twenty miles. Metz, Nancy and Liège are not much farther away.

It is "a city in the countryside".

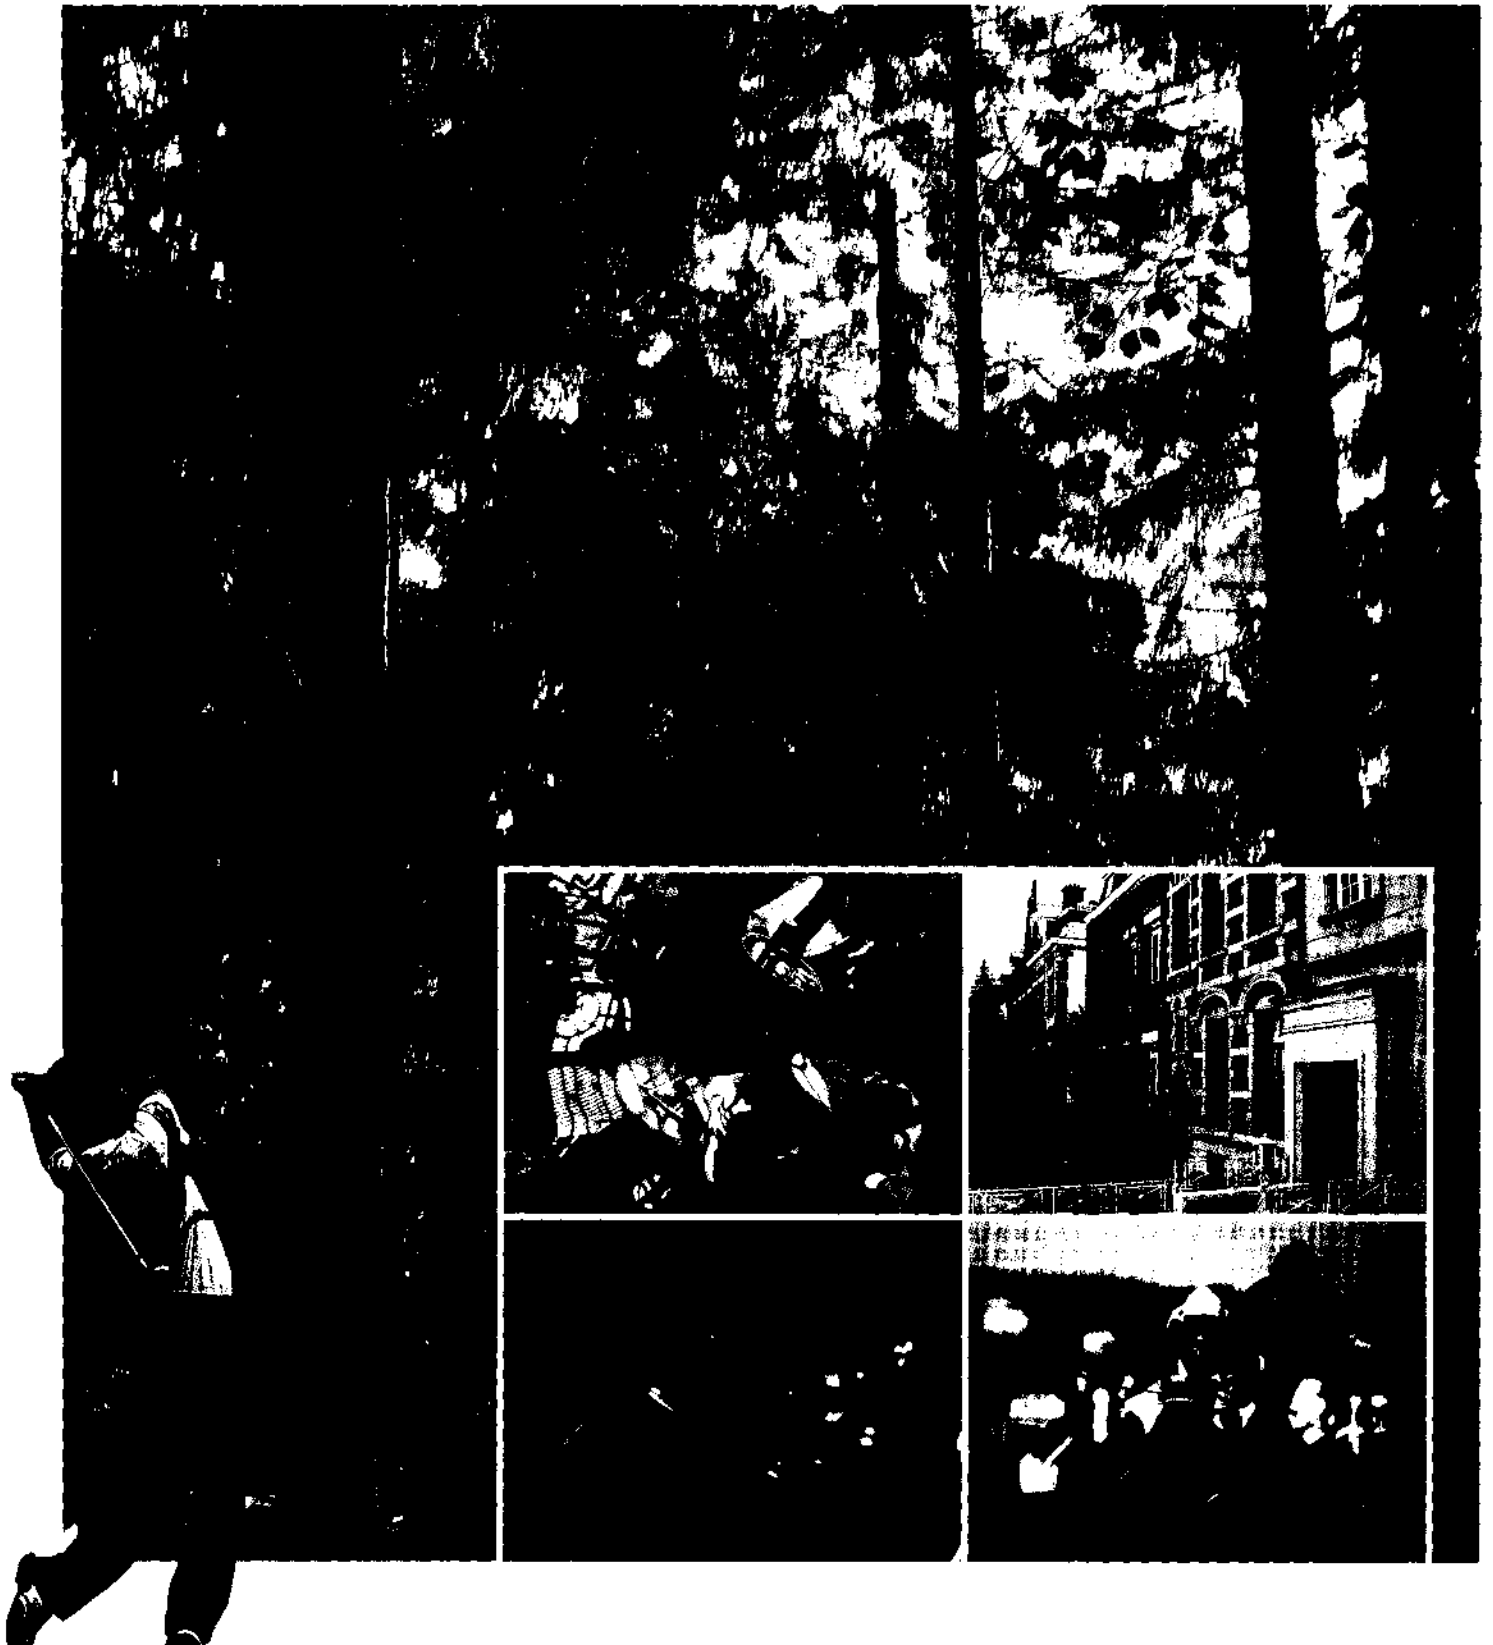

BANKS IN LUXEMBOURG

EUROPEAN INVESTMENT BANK

A spot to live in a high-quality urban environment.

The EUROPEAN DEVELOPMENT AREA has launched an ambitious program integrating residential and environmental development. Building and renovation plans are in progress to match any standard of comfort, with plenty of sport facilities and business services.

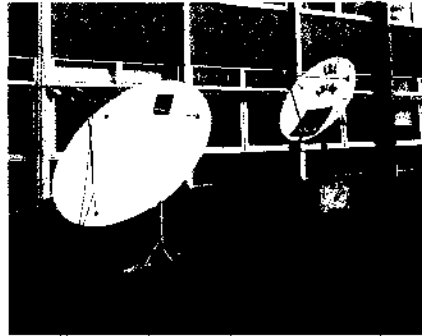

In terms of leisure, the EUROPEAN DEVELOPMENT AREA benefits from the close proximity of well known cultural cities and attractive tourist areas such as the Grand Duchy of Luxembourg, the Lorraine region with its Metz and Nancy towns, as well as the Belgian and French Ardennes. The Vosges mountains and Alsatia are within easy reach all year round.

A spot where education is fostered by the European Technology College.

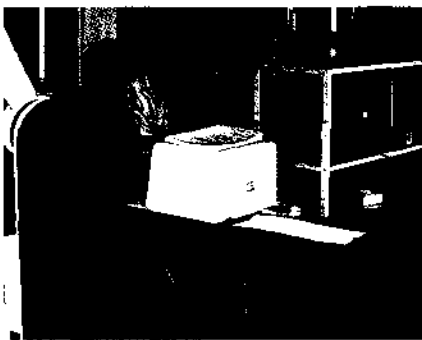

Cost nor effort have been spared on training and research facilities which, geared to business and industry, cover labour, engineering, and management requirements.

The European Technology College has become an efficient educational unit, federating training and education throughout the EUROPEAN DEVELOPMENT AREA with the support of numerous vocational institutions and universities in Longwy, Luxembourg, Arlon and Virton.

Can international leading companies be wrong...?

If international industry leaders have selected the EUROPEAN DEVELOPMENT AREA, they must have had compelling reasons to do so. You can't go wrong joining them.

BELGIUM : Ampacet ■ Cellulose des Ardennes ■ Champion Spark Plugs ■ Ferrero ■ Glaverbel ■ Magolux ■ Mobil Plastics Europe ■ US Gypsum.

FRANCE : Cape Board ■ Daewoo ■ Epeda Bertrand Faure ■ Haitai ■ Heuliez Lebranchu ■ JVC ■ Manducher ■ Oetinger ■ Panasonic ■ Peugeot ■ Usinor Sacilor.

LUXEMBOURG : ARBED and MMRA ■ Avery Fasson ■ Catalyst ■ Ceratungsten ■ Du Pont de Nemours ■ General Motors ■ Goodyear ■ Hydrolux ■ Luxguard ■ Recovery Europe ■ TDK.

DEUX NOUVEAUX PROJETS INDUSTRIELS LOCALISES SUR LE PARC INTERNATIONAL D'ACTIVITES

DAEWOO ELECTRONICS

DAEWOO ELECTRONICS Ltd vient d'annoncer la construction de sa nouvelle unité de production, destinée à la fabrication de tubes de télévision couleurs sur le Pôle Européen de Développement de Longwy (Meurthe-et-Moselle).

DAEWOO est déjà présent en Lorraine depuis 1988 par deux installations : l'une à VILLERS LA MONTAGNE près de Longwy où elle emploie près de 160 personnes dans la fabrication de fours à micro-ondes, l'autre à FAMECK en Moselle où une unité de 314 personnes est en cours de montage pour produire des téléviseurs à partir d'Avril 1993.

La nouvelle usine de tubes couleurs sera implantée sur un terrain initial de 12 hectares situé près du point triple, dans des bâtiments spécifiques à construire d'une surface de 28 780 m². Cette usine exportera 65 % de sa production.

L'outil de production, d'une valeur de 480 MF (pour un investissement total de 825 MF) permettra une production de 800 000 tubes avec 640 personnes dont 21 Coréens.

ANAF FRANCE

La PMI italienne ANAF SPA a confirmé sa volonté de localiser sur le Parc International d'Activités du Pôle Européen de Développement une unité de production d'extincteurs individuels.

L'objectif de production se situe à 300 000 unités, pour une exportation au départ de 30 % du volume, en progression jusqu'à 55 %.

Cet investissement représente un programme de 20 MF environ, permettant la création de 30 emplois qualifiés. L'unité de production couvrira 3 000 m² dans un premier temps (pour être portés à terme à 5 000 m²). Elle sera située sur la commune de MONT SAINT MARTIN.
